
We Love 3rd Grade!

Third Grade is our last year in lower elementary school as we prepare to launch into upper elementary!

*Our Class Verse:
And Jesus increased in wisdom and stature, and in favor with God and man.
Luke 2:52*

Every morning we strive to increase in wisdom (**growing spiritually**) during Bible class. We learn the books of the Bible, memorize them in order, study the different sections, and practice finding them. This helps us learn to use God's Word for our own personal study while also preparing us for the Bible Sword Drills we'll do in upper elementary.

We have many opportunities to increase in

stature (**growing physically**): P.E., recess, field day, and lunch! Yippee, let's go and grow!

We fill the rest of our time with activities that help us increase in favor with God and man (**growing mentally and socially**). We seek to develop the talents and abilities God has given us to bring glory to Him, please our parents and teachers, and learn how to be a good friend and servant to others.

~In **Math** we learn addition, subtraction, multiplication, and division! Our teacher says we'll use those the rest of our lives. ☺ We also study how to use money and clocks along with some geometry and even something called pre-algebra every now and then! Math keeps our minds very busy!

~ In Language Arts (English, Reading, Writing, and Spelling) we decode, decipher, and discover the wonderful world of meaning through the written and spoken word. Writing letters, book reports, keeping a journal, and participating in our annual winter reading contest are just a few of the fun and helpful ways we accomplish

this! Wow, what an adventure!

~In History and Science we journey to Independence Hall, the Wild West, and Civil War battle lines. We also put on our imaginary lab coats and classify animals, discover plants, and explore outer space. Our history state projects, Pet Day, and subject-appropriate field trips provide hands-on experience and a lot of fun! As a bonus, we start taking notes in class!

By the end of third grade our mission will be accomplished! By God's grace, the hard work of our teachers and parents, and our diligent efforts, we will have grown wiser, taller, stronger, smarter, and kinder while working hard and having fun all along the way! Most of all, we will be ready to blast off into fourth grade!
