- April 10-13 AACCS National Competition - BJU
- April 13 Tri-weekly grades available on RenWeb
- April 14 Jr/Sr Banquet 5:00 - 7:00 p.m.

Principal's Pen

I hope that you are enjoying your spring break. This week the electrical work is being done on our gym AC to complete our "cool the school," campaign and I want to thank you so much for your prayers and gifts to fully fund this installation. It took us a few years to raise enough money for the project but I appreciate so much all who gave toward this worthwhile project. This has been part of our goal and vision for a number of years and it is joy to see it completed.

Monday, April 9 when we return to school, students in the 9th - 12th grade will be enjoying a special emphasis project hosted by some BJU faculty and students teaching Arduino programming. During that same day, the 48 students who will be traveling Tuesday - Friday for national fine arts competition will be doing final preparation for their varying performances and we look forward to great success for them.

I will be in the office most of the week, so if we can help you with anything, please let me know. Thank you for re-enrolling for next year, as that helps us so much in planning efficiently for next year.

See you Monday,

Dr. C

AACS Nationals

Departure time: Tuesday, April 10 approximately 1:15 p.m.

Return time: Friday, April 13 approximately 1:00 p.m.

We will still have profitable classes for students not attending this trip.

BJU Technology Team

We are excited to welcome the technology team from BJU on Monday, April 9. They will be working with all of our high school students to collaborate in groups of two on an "Internet of Things" project using Arduino programming. It will be a great opportunity for them to work on communication, leadership and problem-solving skills, learn new technology and to explore a possible career path too!

Traffic in the morning: We all want the drop off and pickup of students to be as safe and convenient as possible. Recently some of our families who are dropping off students the last five minutes or so before school starts are not pulling up all the way to the last cone, thus holding up traffic and creating unnecessary congestion. Thank you in advance for helping out with this opportunity not only to drop off students in the safest way possible, but also to be considerate of others.

BJU Afterschool help: A month ago, in our newsletter we featured a great opportunity to help students in language arts and math. To make it easier to access, we have posted the link on our website. Any students who need help / practice in these areas will benefit from spending time on this site. Just click on our BBCS website home page and you will see the link at the bottom or click here on this amazing free resource. <http://afterschoolhelp.com/>
