

Announcing BBCS Bring Your Own Device

Bible Baptist Christian School will be launching a new technology initiative for grades 9-12 on February. Each student that is taking an online class will be allowed to have a tablet pc or laptop that they can carry to class on a regular basis. Since each family is providing their own device in this initiative, the parents and student have the option to choose what type of device they will bring to school within certain limits. This type of technology initiative is called a Bring Your Own Device (BYOD) initiative.

As an option, students in grades 9-12 may purchase e-textbooks if one is available from the publisher. Parents will be totally responsible for all aspects of the e-text cost, ordering and maintenance. Ordering information is available through the school office. Each student will still be issued a paper textbook for their use as normal for this second semester. We will be offering a tuition discount next year for any e-textbook purchase in place of the paper textbooks the school normally provides to students. Information about this opportunity will be sent to parents soon.

BBCS recognized the importance and relevance of encouraging and training our students to use technology properly and to solve real school (work) related problems. It is the desire of the faculty and administration that we prepare our students with an excellent 21st-century education.

Before any student can bring their own device, it must be registered through our BBCS IT Department. Parents and students must sign our BYOD Policy Form. Please click or go to the following link to get started. https://docs.google.com/forms/d/1vTN-8tchI2AQI2_D_jLsMD1S-1BRgw79eNTiSpiwGLs/viewform
